QUESTION: 328
TCP-over-IPv6 traffic is not optimized although you have enabled packet-mode optimization and restarted the optimization service. What could be causing this issue? (Select 2)

A. You need to configure in-path rules for the traffic you wish to optimize on the client-side Steelhead appliance.
B. in-path rules are bidirectional and only need to be configured on the client-side Steelhead appliance.
C. You need to configure in-path rules for the traffic you wish to optimize on the server-side Steelhead appliance.
D. You need to configure auto-discovery in-path rules for the traffic you wish to optimized on the server-side Steelhead appliance.
E. It is not possible to optimize TCP-over-IPv6 traffic with packet-mode optimization.

QUESTION: 329
What is required for the Embedded Cascade Shark function to work? (Select 3)

A. TCP port 61898 should be open between the Steelhead and the remote Cascade Pilot.
B. You must give the username Shark a password.
C. You must enable Cascade Shark on the Management Console TCP Dumps menu.
D. The optimization service needs to be restarted.

QUESTION: 330
How can you verify that encrypted Lotus Notes traffic is correctly optimized?

A. Looking at the Current Connections report for a successful connection that should appear as NOTES-ENCRYPT.
B. Double checking that encrypted Lotus Notes is enabled.
C. Restarting the service.
D. Looking at the Current Connections report for an unsuccessful connection that should appear as NOTES-ENCRYPT.

Answer: A

QUESTION: 331
What type of problem does the error message below indicate:
Sep 13 03:50:51 SH alarmd[18371]: [alarmd.NOTICE]: Alarm 'admission_mem' triggering Sep 13 03:50:51 SH alarmd[18371]: [alarmd.NOTICE]: Alarm 'admission_control' triggering
Sep 13 03:50:51 SH alarmd[18371]: [alarmd.NOTICE]: Alarm 'health' severity changed to 'Admission Control'

A. High CPU Utilization
B. Paging alarm
C. Admission control on connections
D. Admission control on memory
E. Admission control on system

Answer: D

QUESTION: 332
What type of problem does the error message below indicate:
Aug 30 18:19:27 SH pm[18716]: [pm.ERR]: Output from sport:
/opt/rbt/bin/sport (pid 11304) received signal 6 (SIGABRT) dumping core

A. It is not a problem, but part of the regular operation
B. The management process crashed
C. The optimization process crashed
D. The management process received permission to connect to a Granite Core device
E. The sport process received permission to connect to a Granite Core device

Answer: C

QUESTION: 333
What type of problem does the error message below indicate:
Sep7 22:53:50 SH pm[18184]: [pm.NOTICE]: Output from sport:
/opt/rbt/bin/sport (pid 27529) received signal 12 (SIGUSR2) marking bit

A. It is not a problem. The message is displayed when a system dump is generated.
B. The management process crashed
C. The optimization process crashed
D. The management process received permission to apply QoS marking
E. The sport process received permission to apply QoS marking

Answer: A

QUESTION: 334
Citrix optimization does not work although you removed ports 1494 and 2598 from the Interactive Ports label and enabled Citrix optimization on the client-side Steelhead appliance. What could be the problem? (Select 2)

A. You need to enable Citrix optimization on the server-side Steelhead appliance.
B. Secure ICA encryption needs to be enabled.
C. Citrix CDM optimization needs to be enabled.
D. You need to restart the optimization service.

Answer: A, D

QUESTION: 335
Citrix remote applications, running on the server and to access printers and disk drives, are not performing well. What can you configure to improve the performance?

A. Enable Citrix CDM optimization.
B. Enable SecureICA encryption.
C. Session Reliability (CGP) Port.
D. Enable Citrix Traffic Fallback Behavior.

Answer: A

QUESTION: 336
After completing the SRDF configuration on both Steelhead appliances and restarting the optimization service, the SRDF connections in the Current Connections report show a red protocol error icon in the Notes column. What could be a cause of this issue?

A. A SRDF protocol error can occur when attempting to optimize traffic originating from the LAN-side of the Steelhead appliance. Please check the LAN-side Symmetrix array for compatibility.
B. The red icon indicates that RiOS is optimizing the connection normally.
C. A SRDF protocol error can occur when attempting to optimize traffic originating from the WAN-side of the Steelhead appliance. Please check the WAN-side Symmetrix array for compatibility.
D. Symmetrix needs to be enabled on the EMC server.

Answer: A

QUESTION: 337
On Steelheads, by default tcpdump:

A. captures packets with an 802.1Q tag.
B. does not capture packets with an 802.1Q tag
C. does not capture packets with an 803.3Q tag.
D. does not capture packets with an 802.11Q tag.

Answer: B

QUESTION: 338
Authentication fails for certain users after configuring the Server-Side Steelhead
Appliance to be a RODC. What could be the issue?

A. These users make use of NTLM authentication.
B. These users exclusively make use of Kerberos authentication.
C. Overlapping open is enabled.
D. SMB signing is required.

Answer: B

QUESTION: 339
In a virtual-inpath deployment, when the Steelhead appliance exports data to a flow
data collector:

A. All traffic has the LAN and WAN interface index.
B. All traffic has the WAN interface index.
C. All traffic has the LAN interface index.
D. All traffic has the primary interface index.

Answer: B

QUESTION: 340
On the Interceptor appliance, connection tracing feature enables you:

A. To determine to which Interceptor appliances the Virtual Steelhead appliance has

redirected specific connections.

B. To determine to which Interceptor appliances the Steelhead appliance has redirected specific connections.

C. To determine to which Steelhead appliances the Interceptor appliance has redirected specific connections.

D. To determine to which Mobile Controller the Interceptor appliance has redirected specific connections.

Answer: C

QUESTION: 341

While performing a health check for a Steelhead appliance at a remote site, you noticed some of the pass-through traffic should have been optimized. The pass-through reason for the suspicious traffic is "SYN on WAN side". Upon further investigating, you also noticed that all of the traffic initiated at the data center is pass-through while all of the traffic initiated at the remote site is optimized. There is only one path between the data center and the remote site and both Steelhead appliance are physically in-path. What are the possible causes? (Select 2)

A. There is a pass-through in-path rule configured on the data center Steelhead appliance.

B. There is a pass-through in-path rule configured on the remote site Steelhead appliance.

C. There is a pass-through peering rule configured on the data center Steelhead appliance.

D. The LAN and WAN interfaces on the data center Steelhead appliance are reversed.

E. The LAN and WAN interfaces on the remote site Steelhead appliance are reversed.

Answer: A, D

QUESTION: 342

After installing a Steelhead appliance at a remote site, users started complaining about some optimized applications being slower. After some initial investigating, you discovered a backup job was consuming most of the bandwidth causing congestion. You also found that QoS is configured on the router and should have prevented this but it did not. What is the most likely cause?

A. Simplified routing is not enable on the remote Steelhead appliance.

B. Simplified routing is not enable on the data center Steelhead appliance.

C. Asymmetric routing.

D. QoS on the router identifies traffic using destination IP and ports while the

Steelheads are configured to use correct addressing.
E. QoS on the router identifies traffic using destination IP and ports while the
Steelheads are configured to use full transparency.

Answer: D

These questions are for demo purpose only. **Full version** *is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.

Exam Dumps: Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.

Practice Tests: Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success: Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.

Updated Content: Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.

Technical Support: Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.
