Question: 85

Which line instructs ansible to install httpd?

- A. yum: name=httpd state=installed**
- B. tasks: install httpd**
- C. service: name=httpd state=installed**
- D. name: service=httpd state=installed**

Answer: A

Explanation:

The yum module is an appropriate way to install software

Question: 86

Which Ansible ad-hoc flag is analogous to the become directive?

- A. b**
- B. f**
- C. i**
- D. B**

Answer: A

Explanation:

The b flag actually stands for become! They both have Ansible escalate to the become_user.

Question: 87

Question: 88

What is the primary difference between the shell and command module?

- A. The shell module is for executing shell commands, and the command module is for Ansible internal commands.**
- B. The shell module sets up a shell environment and the command module only runs the provided command.**
- C. The shell module sets a default shell whereas the command module executes a shell command.**
- D. There is no difference.**

Answer: B

Question: 89

Which command is the correct way to run the playbook /home/ansible/Buildwww.yml using the inventory file /home/ansible/inventory, assuming your present working directory is /home/ansible?

- A. ansible -i inventory Buildwww.yml**
- B. ansible -i inventory -p Buildwww.yml**
- C. ansible-playbook -i inventory -p Buildwww.yml**
- D. ansible-playbook -i inventory Buildwww.yml**

Answer: D

Explanation:

This command is the correct way to run the playbook using the requested inventory

Question: 90

Consider the following playbook.

- hosts: webservers become: yes
- name: install httpd yum: name: httpd state: latest

Which line includes a syntax error?

- A. become: yes – there is no attribute called become**
- B. yum: – yum should be proceeded with a hyphen**
- C. The file does not end with end-playbook.**
- D. The playbook does not include the task directive.**

Answer: D

Explanation:

The "task:" directive is required at the prior to providing the tasks of a playbook. Without it, Ansible will not throw an error.

Question: 91

Which of the following attributes specifies how a handler can be notified? (Choose all that apply.)

- A. name**
- B. service**
- C. listen**
- D. handle**

Answer: AC

Explanation:

While using the handler's name attribute is not encouraged, it does work.

Question: 92

Question: 93

What command is used to run a playbook?

- A. ansible-playbook <playbook>**
- B. ansible <playbook>**
- C. ansible-p <playbook>**
- D. playbook <playbook>**

Answer: A

Explanation:

This command will run a given playbook successfully.

Question: 94

What keyword stores a command's output into a variable?

- A. register**
- B. output**
- C. output is stored in a variable named results by default**
- D. debug**

Answer: A

Explanation:

The register keyword will store output from the preceding command into a provided variable.

Question: 95

What does the lineinfile module do?

- A. Allow addition of lines anywhere in a file**
- B. Allows to grep for lines in a provided file**
- C. Allow additions of lines to the end of a file only**
- D. Input data into a file from stdin**

Answer: A

Explanation:

The purpose of the lineinfile module is to add lines anywhere in a file passed on a pattern.

Question: 96

Observe the details of the following dynamic inventory file. \$ ls -l dynamic.py -rw-rw-r--. 1 user user 1928 Mar 30 08:21 dynamic.py Why will this inventory file cause the ansible command to fail?

- A. Ansible cannot use python scripts as inventories.**
- B. The ansible user must own the file.**
- C. The file is not executable.**
- D. The ansible command will not fail using the noted file with the given details.**

Answer: C

Explanation:

Without being executable. Ansible will attempt to parse the script as a static inventory and fail.

Question: 97

Is it possible to specify multiple inventory files at once?

- A. Yes, you specify your inventory as a directory containing valid inventory files.**
- B. No.**
- C. Yes, you must provide extra parameters to the -i flag.**
- D. Yes, you must specify a reference inventory master file.**

Answer: A

Question: 98

A dynamic inventory must return data in what format?

- A. JSON**
- B. XML**
- C. YAML**
- D. INI**

Answer: A

Explanation:

Dynamic inventories must return JSON output.

Question: 99

Examine the following inventory excerpt file named `/home/user/ansible/inventory`. `[dbservers] db1.example.com`
Which of the following files does Ansible check for variables related to that inventory? (Choose all that apply.)

- A. `/home/user/ansible/dbservers`**
- B. `/home/user/ansible/host_vars/db1.example.com`**
- C. `/home/user/ansible/host_vars/db1`**
- D. `/home/user/ansible/group_vars/dbservers`**

Answer: BD

Explanation:

Ansible will check in `/home/user/ansible/host_vars` to find files named after hosts defined in the inventory. Ansible will check this file because there is a group defined in the inventory as `dbservers`.

Question: 100

Which flags must be accepted as input for a dynamic inventory script?

- A. Only `-list`**
- B. `-host [hostname]` and `-list`**
- C. `-host [hostname]` and `-inv-list`**
- D. `-list` and `-format [file format]`**

Answer: B
