QUESTION: 159
Which of the following file system configurations are correct for the N8500 clustered NAS storagesystems?(Select 2 answers)

A. Set not more than 16 columns in a stripe file system to prevent serious data discretization.
B. Set a block size to 8192 when the file system size is larger than 1TB.
C. Set the number of columns consistent with that of RAID groups for a stripe file system,
D. You are advised to disable quotas if the number of files exceeds 40 million.

Answer: B, C

QUESTION: 160
An N8500 clustered NAS storage system cannot be logged in to using the master account. Which is the possible cause?

A. The console IP address conflicts with another IP address on the network.
B. The network port corresponding to the console IP address is not connected to a network cable or is in the shutdown state.
C. The user name and password have been changed.
D. A heartbeat link is down.

Answer: D

QUESTION: 161
Which of the following are characteristics of big data? (Select 3 answers)

A. Huge data volume
B. Authentic and valid data
C. Fast data circulation
D. Various data types

Answer: A, C, D

QUESTION: 162
An OceanStor 9000 storage system is deployed using the OceanStor Toolkit. Which of the following statements about the settings of the OceanStor Toolkit configuration file are correct?(Select 2 answers)

A. The cluster name can be set to 9000cluster.
B. If the InfoLink license has not been purchased, you may skip the InfoLink DNS configuration.
C. The front-end network gateway will serve as the default gateway of all storage nodes after being configured.
D. The data redundancy ratio is the default ratio of all directories on the OceanStor 9000.

Answer: C, D

QUESTION: 163
Which of the following network file sharing protocols are supported by a NAS storage system? (Select 2 answers)

A. FAT32
B. NTFS
C. NFS
D. CIFS

Answer: C, D

QUESTION: 164
In an N8500 clustered NAS system, which of the following commands are commonly used to query a cluster's detailed resource information? (Select 2 answers)

A. hares -state
B. hares -display
C. hagrp -dep
D. hagrp -state

Answer: A, B

QUESTION: 165
In the OceanStor 9000, a node pool is a collection of nodes that have the same characteristics such as physical type and access performance, and DST allows a user to divide physical nodes in the same file system into node pools.

A. TRUE
B. FALSE

Answer: A

QUESTION: 166
Which of the following can be used to manage secure access to NFS shares? (Select 2 answers)

A. AD
B. NIS
C. LDAP
D. Homedir

Answer: B, C

QUESTION: 167
The three mainstream storage forms are as follows:1)SAN storage that provides block resources; 2)NAS storage that provides file system resources;3) object-based storage (OBS). SAN storage and NAS storage are traditional storage forms. Which of the following statements about the characteristics of the three storage forms are correct? (Select 3 answers)

A. In traditional storage forms, disks are partitioned, file systems record file structures based on a tree relationship, and metadata is used to identify the use of blocks.
B. Objects are the basic units of OBS. Each object is a composite of data and data property sets.
C. In the OBS mechanism, data and metadata are stored and managed in a distributed manner.
D. OBS is typically oriented to structured data applications.

Answer: A, B, C

QUESTION: 168
In an N8500 clustered NAS system, underlying virtualization is implemented by the VxVM component. The virtual objects managed by the VxVM are VM disks, disk groups, subdisks, and plexes. Which of the following statements is incorrect?

A. A VM disk is controlled by the VxVM and typically located in a disk group. Each VM disk corresponds to at least one physical disk or disk partition.
B. A disk group is a collection of VM disks.
C. A subdisk is the basic unit for the VxVM to allocate disk space. To improve the

efficiency of underlying resource use, a subdisk can be a group of inconsecutive disk blocks. D. A plex consists of one or multiple subdisks on one or multiple physical disks. Each plex contains a duplicate of the data selected in a volume.

Answer: C

QUESTION: 169
The license must be purchased for which of the following software features of the OceanStor 9000?(Select 3 answers)

A. WushanFS
B. InfoLink
C. InfoQuota
D. InfoTier

Answer: B, C, D

QUESTION: 170
If the name of a shared directory is dirtest in an OceanStor 9000 storage system, local users who have permission can access the directory by entering *.*.*.*\dirtest, where *,*.*,* must be the front-end service IP address of the node that provides storage space for the dirtest directory.

A. TRUE
B. FALSE

Answer: B

QUESTION: 171
Which of the following storage services can the N8500 clustered NAS system that employs the integrated networking mode provide for application servers? (Select 3 answers)

A. CIFS
B. 10 Gbit/s iSCSI SAN
C. SASSAN
D. FCSAN

Answer: A, B, D

QUESTION: 172
Which of the following statements about the login information of the OceanStor 9000 after its software installation is complete are incorrect?

A. The account and default password for logging in to the OceanStor DeviceManager are admin and Admin @storage respectively.
B. To log in to the OceanStor DeviceManager from Internet Explorer, enter https://xx.xx.xx.xx:8088, where xx.xx.xx.xx is the management IP address of the OceanStor 9000.
C. The default password for the default account root of the Linux operating system running on a storage node is root@storage.
D. To log in to the IPMI of a storage node on Internet Explorer, enter https://xx.xx.xx.xx, where xx.xx.xx.xx is the IP address of the IPMI port on the storage node.

Answer: C

QUESTION: 173
The master account is used to enter the CLI mode of N8500 V200R001. Which of the following operations can be performed related to NFS? (Select 3 answers)

A. nfs server show
B. nfs server status
C. nfs server start
D. nfs server stop

Answer: B, C, D

QUESTION: 174
A customer's OceanStor 9000 big data storage system uses GE for the front-end network and 10GE for the back-end network. If the OceanStor 9000 is configured with four C nodes, only a basic cabinet is required.

A. TRUE
B. FALSE

Answer: A

QUESTION: 175
For one or more Windows clients to access the storage resources on an OceanStor 9000

storage system, the administrator needs to create a directory under the root directory on the specified storage node and authorize the new directory to the target user or user group.

A. TRUE
B. FALSE

Answer: B

QUESTION: 176
The OceanStor 9000 can be installed in a Huawei-supplied cabinet only.

A. TRUE
B. FALSE

Answer: B

QUESTION: 177
The OceanStor 9000 allows users to define file pool polices based on file attributes and I/O frequency. Which of the following statements about file pool polices are correct? (Select 3 answers)

A. A create policy is used to determine the initial location where a newly created file is to be stored. Such a policy includes the following items:file storage path, file name, and UID/GID.
B. A relocate policy is used to determine the target location where a file is to be migrated.
C. A delete policy is used to determine when to delete a file from the system.
D. A modify policy is used to determine how to modify a file.

Answer: A, B, C

QUESTION: 178
Which of the following statements about the intelligent load balancing feature of the OceanStor 9000 are correct? (Select 3 answers)

A. Performance is balanced among all nodes. Capacity cannot be balanced among all nodes.
B. Nodes can be divided into zones. An independent load balancing policy and an independent domain name can be configured for each zone.
C. Load balancing policies can be based on CPU usage, memory usage, bandwidth usage, number of network connections, and/or node capability.

D. The OceanStor 9000 provides the load balancing service based on round robin, CPU usage, or the number of connections to a node.

Answer: B, C, D

KILL EXAMS
KILLEXAMS.COM

KILLEXAMS.COM

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
