TOGAF Enterprise Architecture Combined Part 1 and Part 2

Question: 171

Which of the following statements about architecture partitioning are correct*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 2 & 3
- B. 1 & 3
- C. 1 & 4
- D. 2 & 4

Answer: B

Explanation:

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture. Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries.

Reference: The TOGAF® Standard | The Open Group Website, Section 2.5 Architecture Partitioning

Question: 172

Complete the following sentence:

Presenting different_____and_____to stakeholders helps architects to extract
hidden agendas principles and requirements that could impact the final Target
Architecture

- A. Alternatives Trade-offs
- B. Solutions Applications
- C. Architecture Views Architecture Viewpoints
- D. Business Scenarios Business Models

Answer: A

Explanation:

Presenting different alternatives and trade-offs to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture. Alternatives are different ways of achieving a desired

outcome, while trade-offs are compromises or sacrifices that must be made to choose one alternative over another.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.1 Business Scenarios.

Question: 173

What is presented as striking a balance between positive and negative outcomes resulting from the realization of either opportunities or threats?

- A. Agile development
- B. Architecture Security
- C. Transition Management
- D. Risk Management

Answer: D

Explanation:

Risk Management is the process of identifying, assessing, and responding to risks that may affect the achievement of the enterprise’s objectives. Risk Management involves balancing positive and negative outcomes resulting from the realization of either opportunities or threats.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.3 Risk Management.

Question: 174

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
?	Sufficient documentation to get permission to proceed. Permission to proceed to develop a Target Architecture to prove out a summary target.	The scope of the problem being addressed. Those who have interests that are fundamental to the problem being addressed. (Stakeholders & Concerns) What summary answer to the problem is acceptable to the stakeholders? Stakeholder priority and preference. What value does the summary answer provide?

Which ADM Phase does this describe?

- A. Phase A
- B. Phase B
- C. Preliminary Phase
- D. Phase C

Answer: B

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture

to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

Question: 175

Complete the sentence The TOGAF standard covers the development of four architecture domains. Business. Data, Technology and_____.

- A. Segment
- B. Transition
- C. Capability
- D. Application

Answer: D

Explanation:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology and Application. These domains represent different aspects of an enterprise's architecture and provide a consistent way of describing, analyzing, and designing them.

Reference: The TOGAF® Standard | The Open Group Website, Section 2.2 Architecture Development Method (ADM).

Question: 176

Which of the following are the four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository-?

- A. General Foundational Subordinate and Superior Architecture
- B. Segment, Capability. Enterprise and End-to-end Target Architecture
- C. Avant-Garde Big-Bang, Discreet and Cohesive
- D. Strategy Portfolio Project Solution Delivery

Answer: B

Explanation:

These four purposes frame the planning horizon, depth, and breadth of an Architecture Project and the contents of the EA Repository. They help to determine the scope and focus of the enterprise architecture initiative.

Question: 177

Which statement best describes iteration and the ADM?

- A. The ADM is iterative within the first cycle and then between phases
- B. The level of detail is defined once and applies to all iterations
- C. The ADM is sequential Iteration is applied within phases
- D. The ADM is iterative, over the whole process between phases and within phases

Answer: D

Explanation:

This statement best describes iteration and the ADM. The ADM is iterative over the whole process between phases and within phases because it allows for feedback loops and refinements at any point in the architecture development and transition process. Iteration enables architects to address changing requirements, assumptions, constraints, and environments; to validate and improve architectures; to manage risks and issues; and to ensure stakeholder satisfaction and value realization.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.1 Introduction to the ADM.

Question: 178

Complete the sentence Business Transformation Readiness Assessment is_____.

- A. a joint effort between corporate staff lines of business and IT planners
- B. to ensure the active support of powerful stakeholders
- C. a way to put building blocks into context thereby supporting re-usable solutions
- D. widely used to validate an architecture that is being developed

Answer: A

Explanation:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

Question: 179

What are the following activities part or?

- ⌘ Initial risk assessment
- ⌘ Risk mitigation and residual risk assessment
- ⌘ Risk monitoring

- A. Risk Management
- B. Phase A

- C. Security Architecture
- D. Phase C

Answer: A

Explanation:

The following activities are part of Risk Management:

- â Initial risk assessment
- â Risk mitigation and residual risk assessment
- â Risk monitoring

Risk Management is the process of identifying, assessing, and responding to risks that may affect the achievement of the enterprise's objectives. Risk Management involves balancing positive and negative outcomes resulting from the realization of either opportunities or threats.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.3 Risk Management.

Question: 180

Complete the sentence The Enterprise Continuum provides methods for classifying architecture artifacts as they evolve from_____.

- A. Solutions Architectures to Solution Building Blocks
- B. generic architectures to reusable Solution Building Blocks
- C. Foundation Architectures to re-usable architecture assets
- D. generic architectures to Organization-Specific Architectures

Answer: D

Explanation:

The Enterprise Continuum provides methods for classifying architecture artifacts as they evolve from generic architectures to Organization-Specific Architectures. Generic architectures are architectures that have been developed for use across a wide range of enterprises with similar characteristics. They provide common models, functions, and services that can be reused and adapted for specific purposes. Organization-Specific Architectures are architectures that have been tailored to meet the needs and requirements of a particular enterprise or a major organizational unit within an enterprise. They reflect the unique vision, goals, culture, structure, processes, systems, and technologies of that enterprise or unit.

Reference: The TOGAF® Standard | The Open Group Website, Section 2.3 Enterprise Continuum.

SAMPLE QUESTIONS

*These questions are for demo purpose only. **Full version** is up to date and contains actual questions and answers.*

Killexams.com is an online platform that offers a wide range of services related to certification exam preparation. The platform provides actual questions, exam dumps, and practice tests to help individuals prepare for various certification exams with confidence. Here are some key features and services offered by Killexams.com:

Actual Exam Questions: *Killexams.com provides actual exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these actual questions, candidates can familiarize themselves with the content and format of the real exam.*

Exam Dumps: *Killexams.com offers exam dumps in PDF format. These dumps contain a comprehensive collection of questions and answers that cover the exam topics. By using these dumps, candidates can enhance their knowledge and improve their chances of success in the certification exam.*

Practice Tests: *Killexams.com provides practice tests through their desktop VCE exam simulator and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice tests cover a wide range of questions and enable candidates to identify their strengths and weaknesses.*

Guaranteed Success: *Killexams.com offers a success guarantee with their exam dumps. They claim that by using their materials, candidates will pass their exams on the first attempt or they will refund the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exams.*

Updated Content: *Killexams.com regularly updates its question bank and exam dumps to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.*

Technical Support: *Killexams.com provides free 24x7 technical support to assist candidates with any queries or issues they may encounter while using their services. Their certified experts are available to provide guidance and help candidates throughout their exam preparation journey.*
